Facility Committee Minutes

January 19, 2022

The committee reviewed the two bids for renovating the new school. One company has quite a bit of experience with charter schools in NH and MA. The other has built traditional schools in NH. They both have great reputations and are dealing with delays like other construction companies with the supply chain. Both optimistic about meeting the deadline to open the school with a June 30 goal.

The committee is leaning in the direction of the less expensive and local group for the project.

Discussion was had about the need for donations and making up the difference due to the cost of renovation plans. An updated bid from the second group is coming. A plan for donations and fundraising needs to start soon.

Meeting adjourned
